I do not know a lot of details, but our response office does have a present at the same Exicde site as is being referenced here by DTSC. MM

Thanks Matt. If these is a site if you could send me that would be appreciated.

Date wise it looks like November 2nd and Nov 17th could work.

Rick,

We might have done availability in November if that works for your team.

By any chance do you know if EPA has also done work on the site? It helps on the funding from my end if there is already an EPA charge number associated with the project.

Hello Joe,

The State of California, Department of Toxic Substances Control, would like to have you group provide another SCRIBE Training for our EXIDE Branch here in Sacramento, California.

The Branch that is assigned to our EXIDE lead battery site is interested in using the SCRIBE tool for the project and at least 10 people are committed to attending a training session.

We look forward to using the Scribe on this high priority project.

Our training is time critical for our project, so your timely response is greatly appreciated.

Please let me know how we can arrange for this critical training to move forward as fast as possible.

Regards,

Rick Fears, P.G.
